**TECH TIP: #11-3091 and #11-3093**

Modification required. O.E. Models equipped w/shutters have a 3 terminal thermostatic switch which turns on the fan when the A/C is engaged. This switch has been discontinued, and is replaced with a 2 terminal switch. A high pressure switch (P/N #11-2025) must also be installed on the high side of the system, with lead wired to the fan clutch circuit in order to operate fan & shutters. This may require the use of a charging port/hose splicer in order to mount the pressure switch. If installed into high pressure hose (size 13/32") use P/N 08-3022. If installed into liquid hose (size 5/16") use P/N 08-3021.
